SUMMARY

Frontend Software Engineer with **3+** years of experience developing responsive web applications interface using React, Next.js, and TypeScript. Experienced in building **reusable UI component libraries**, reducing page load latency, and writing clean, maintainable code. Adept at handling state management, API integrations, and collaborating with backend engineers to deliver end-to-end features.

SKILLS

Programming Languages: JavaScript , TypeScript

Libraries and Tools: React.js, Redux, Next.js, HTML, CSS3, Tailwind CSS, Bootstrap, MaterialUI, Ant Design, Git, Nodejs, Expressjs, Chart.js

Debugging & Testing: Browser DevTools, Jest, Lighthouse

Project Management & Version Control: Git, Github

EXPERIENCE

Frontend Software Engineer — CSS Founder

Noida, U.P | June 2024 – Present

- Developed a **template-based website builder** with **20+ reusable page sections**, allowing **users to edit content** and restructure pages through **drag and drop**. Built the state management and component rendering flow to keep the editor and website preview synchronized as users modify section content, visibility, and order.
- Handled **project requirements** directly with team members and clients, turning functional specifications into clean, working frontend code that **matched expected features**.
- Took part in sprint planning, peer code reviews, and weekly **production releases**.

Frontend UI Developer — GET WEB INDIA

Noida, U.P | Jan 2023 – Apr 2024

- Converted **Figma designs** into responsive, pixel-perfect interfaces while ensuring cross-browser compatibility and consistent user experience.
- Built modular **UI components** used across multiple client websites to speed up development time. Fixed layout bugs and **cross-browser styling issues** across Chrome, Firefox, and Safari.

Projects

ETA Visa Application - Next.js, Tailwind, Typescript

[\(link\)](#)

- Built a **5-step ETA visa application** flow across **12 screens** using Next.js, with Redux Toolkit for cross-step form state, client-side validation, conditional form fields, document uploads, and step-based navigation.

Webuildex Visual Web Engine - Next.js, Typescript, Tailwind, Gsap

[\(link\)](#)

- Built a **drag-and-drop website builder** with Next.js and TypeScript, supporting **10+** templates and **30+** editable page components. Implemented visual section reordering, component editing, and synchronized **live previews without page reloads**.

Stylam Web Platform & Design System - Html, CSS, Javascript

[\(link\)](#)

- Developed a responsive web platform and reusable UI component library for a **large manufacturing enterprise**. Standardized button styles, typography and layout grids to ensure clean navigation across all screen sizes.

ACHIEVEMENTS

Awarded Best Performer of the Month at CSS Founder for concurrently managing and executing **multiple high-impact** web development projects while consistently meeting aggressive delivery timelines without compromising code quality or performance.
